

## Work Experience / Internships

---

<b>Research Assistant</b>	<b>Indian Institute of Science</b>	<b>Jan-June 2015</b>
<ul style="list-style-type: none"><li>• Worked on face and attribute recognition from low-resolution video</li><li>• Developed image annotation algorithms in OpenCV ( C++ )</li><li>• Deployed the system to monitor the lab in real time (logs entry and exits in the lab)</li></ul>		
<b>Research Assistant</b>	<b>Indian Statistical Institute</b>	<b>July-Dec 2014</b>
<ul style="list-style-type: none"><li>• Conducted a literature study on sparse representations, non-linear prediction and zooming deblurring</li><li>• Implemented multi-image super-resolution on non-overlapping low resolution images in MATLAB</li></ul>		
<b>Associate Software Engineer</b>	<b>IMImobile</b>	<b>Jan-June 2014</b>
<ul style="list-style-type: none"><li>• Handled Messaging and Voice APIs in Java</li><li>• Developed Unit Test Cases for Feed4junit library</li><li>• Developed an E-Wallet using MongoDB for the Open House App</li></ul>		

## Education

---

<b>North Carolina State University</b>	<b>M.S. in Electrical Engineering</b>	<b>Graduation - Aug 2017</b>
<ul style="list-style-type: none"><li>• Coursework - Algorithms, Object Oriented Design, Data Mining, Machine Learning, Computer Vision, Graphical Models, Computer Networks, Signal Processing, Neural Networks, Random Processes</li></ul>		
<b>Birla Institute of Technology and Science, Pilani</b>	<b>B.E. in Electrical and Electronics Engineering</b>	<b>Graduation - Aug 2014</b>
<ul style="list-style-type: none"><li>• Relevant Courses - Image Processing, Embedded Systems, Numerical Analysis, Operations Research, Fuzzy Logic</li></ul>		

## Skills

---

Languages - Python, R, C++, Java, Ruby on Rails  
Cloud - IBM Cloud, Apache Spark, Heroku, AWS

Databases - MySQL, MongoDB, PostgreSQL  
Tools - MATLAB, Hadoop, Anaconda, Git,  $\LaTeX$

## Technical Experience

---

<b>Machine Comprehension of Text</b>	<b>Python, Tensorflow, ARC Cluster</b>	<b>2017</b>
<ul style="list-style-type: none"><li>• Implemented an NLP pipeline using the LSTM model to find contextual relationship between passages and queries</li><li>• Generated embeddings using word2vec and used softmax activation to generate the answer</li><li>• The model exceeded baseline performance with both the bAbi (72.46%) and IMDB (82.8%) datasets</li></ul>		
<b>Single View Metrology</b>	<b>Python, OpenCV, Blender</b>	<b>2017</b>
<ul style="list-style-type: none"><li>• Computed the vanishing points of an image using LSD and RANSAC</li><li>• Computed the projection and homograph matrix and generated texture maps for the XY, YZ and XZ planes</li><li>• Visualized the reconstructed 3D model using blender</li></ul>		
<b>Biobot Motion Classification</b>	<b>Python, scikit-learn, hmmlearn</b>	<b>2016</b>
<ul style="list-style-type: none"><li>• 42 features were collected from a moving biobot and labeled into four classes</li><li>• PCA and k-fold cross validation was used with Fine KNN classifiers ( F1 score : .81 )</li><li>• Hidden Markov Model was used to improve the result ( F1 score : .94 )</li></ul>		
<b>Daytime Water Detection</b>	<b>Python, scikit-learn, IBM Cloud</b>	<b>2016</b>
<ul style="list-style-type: none"><li>• Identified an optimal segmentation criterion through statistical inference</li><li>• Multi-scale segmentation on daylight images was performed using Naïve Bayes, SVM and ANN classifiers</li><li>• Cross validation and PCA were used to further optimize the procedure</li></ul>		
<b>Panoramic Image Stitching</b>	<b>C++, OpenCV</b>	<b>2016</b>
<ul style="list-style-type: none"><li>• Implemented the SIFT descriptor to find the points of correspondence between two images</li><li>• Computed the Homography Matrix to stitch the images</li></ul>		
<b>Room Reservation System</b>	<b>Ruby on Rails, HTML, Postgres</b>	<b>2016</b>
<ul style="list-style-type: none"><li>• Developed the workflow for a Ruby on Rails application to mimic the NCSU library website</li><li>• Designed the frontend in HTML, databases in Postgres and backend in Ruby on Rails</li><li>• Deployed the site on Heroku</li></ul>
